

ANDREW MURCH GENERAL MANAGER

PROFILE

Andrew has operated in various roles within the petroleum sector since 2000, all of which have required an in-depth awareness of health and safety regulations and safe-working practices coupled with exceptional organisation skills. Andrew has managed high-risk projects throughout the UK and abroad for various blue chip companies and MOD contractors, enabling him to gain extensive experience in many areas surrounding fuel storage operations such as regulatory fuel and tank maintenance programmes, and demonstrate the importance of bespoke site management for high-risk tasks such as manned entry tank cleaning, inspections and decommissioning.
