

## Capabilities

### Environmental Consultancy

Independent Environmental Consultancy team  
with £5 million professional indemnity insurance

---

Environmental risk ranking, compliance audits

---

PFAS investigation and remediation services

---

Phase I environmental assessments

---

Phase II geo-environmental site investigations

---

DSEAR assessments

---

Detailed quantitative risk assessment

---

Remedial options appraisal / remediation action  
plans

---

In-situ and ex-situ remediation scheme design  
and implementation

---

Verification sampling and monitoring

---

Spill / incident response

---

Expert witness

---

### Facility Management (PPM)

Planned Preventative Maintenance  
– fuel systems and infrastructure

---

Engineering inspection, compliance,  
CompEx electrical inspections

---

### Demolition & Decommissioning

Initial consultation and site survey

---

Specialist petrol station decommissioning  
– foam filling of tanks, physical tank removal,  
demolition of canopy / buildings

---

Fuel and hazardous storage facility  
decommissioning and demolition

---

Pipework and associated equipment  
decommissioning

---

Environmental impact assessments

---

Asbestos and chromate testing,  
decontamination and removal

---

RAAC (Reinforced Autoclaved  
Aerated Concrete)

---

Soft-strip services

---

Fully project-managed site and structural  
demolition services

---

Waste recycling and hazardous waste removal

---

Groundworks and land remediation

---

## Construction & Installation

Fuelling infrastructure installations - full build services (tank, pump islands, interceptors, forecourt etc)

---

Separator / drainage system installations

---

Forecourt, car park, modular building installations

---

Replacement of underground fuel storage tanks and cradles

---

EV charging points installation

---

Solar array installation

---

High security fencing installation

---

Ground remediation, excavations and reinstatement

---

Underground services ready for our installation teams to install data and power cables, pipework, pumps, fuel monitoring and leak detection systems

---

## Fuel & Power Management

OFTEC tank inspections

---

Fuel polishing and maintenance

---

Fuel sampling and reporting

---

Fuel tank / generator installations and decommissioning

---

Non-Destructive Testing (NDT) of tanks, pipework and bunds

---

Manned entry tank cleaning

---

Technical fuel advice

---

Complete Site Compliance (CSC)

---

## CompEx Mechanical & Electrical Services

Bespoke design and installation of electrical distribution equipment for forecourts

---

Repairs to dispensers, pumps, signs, floodlights and more

---

Tank gauging systems and high-level alarm systems

---

Earthing and lightning protection systems

---

Canopy and forecourt lighting

---

Leak detection systems

---

Full mains panel design, build and installation service

---

## Surface Preparation

Sandblasting

---

Tank lining and repairs, including cold weld

---

Bund lining and repairs

---

Thermal spraying

---

Commercial painting

---
